

What is programming ?

Computer programming is a medium for us to communicate with computers just like we use Hindi or English to communicate with each other, programming is a way for us to deliver our instructions to the computer.

What is C ?

C is a powerful general-purpose programming language. It can be used to develop software like operating systems, database, compilers and so on. C programming language is an excellent language to learn to program for beginners.

C is one of the oldest and finest programming language. C was developed by Dennis Ritchie in 1972.

Use of C

C is the language that is used to program a wide variety of systems. Some of the uses of C are as follows:

1. Major part of Windows, Linux and other operating systems are written in C.

2. C is used to write driver programs for devices like Tablets, Printers etc.
3. C language is used to program embedded systems where programs need to run faster in limited memory.
4. C is used to develop games, an area where latency is very important i.e. computer has to react quickly on user input.
